

FA STER

HORIZONTAL
FLAT EDGE POLISHERS

MODERN AND COMPACT

The edge polishers **Faster** polish flat edges of marble, granite, quartz, sintered materials and ceramics to a mirror shine.

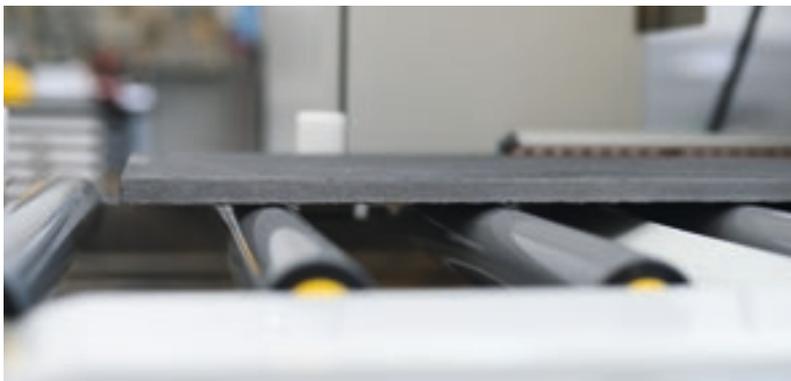

FASTER

- ✓ MAXIMUM MACHINING PRECISION AND VERSATILITY
- ✓ REDUCED TOOLING TIMES AND SIMPLIFIED MACHINING OPERATIONS THANKS TO LATEST-GENERATION AUTOMATIC DEVICES
- ✓ GUARANTEED RELIABILITY AND QUALITY OVER TIME
- ✓ MAXIMUM EASE OF USE THANKS TO A SIMPLIFIED INTERFACE
- ✓ EXCELLENT WORKING ERGONOMICS FOR THE OPERATOR
- ✓ MODERN, FUNCTIONAL DESIGN
- ✓ MINIMAL SPACE OCCUPIED THANKS TO COMPACT WORKING DIMENSIONS

VERSATILE AND AUTOMATIC

Faster is designed to meet the new production needs of workshops where production batches are decreasing while machining operations are increasingly diverse. Faster is the automatic flat edge polishing machine which offers automatic positioning of the various units in accordance with the materials, thicknesses and processes being used, enabling operations to be accelerated and simplified.

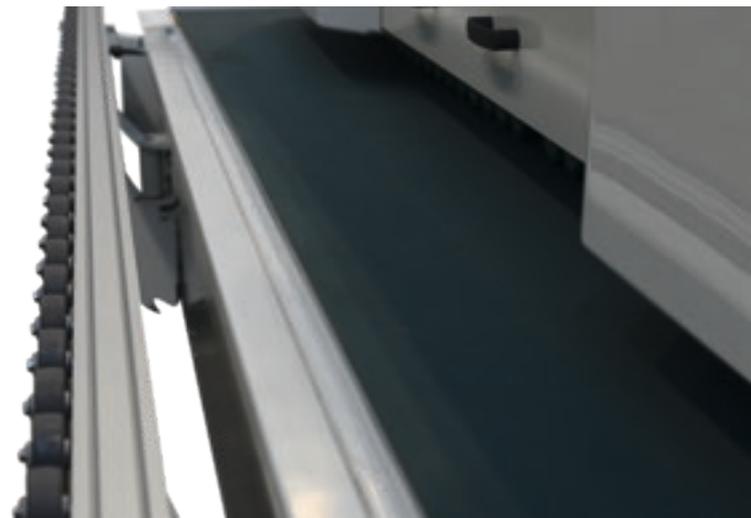

The extreme versatility of Faster edge polishers makes them particularly suitable for a wide variety of applications and sectors: kitchen and bathroom worktops, construction, furniture, interior decoration, building (stairs, door/window sills) and funerary art.

FASTER

Thanks to its compact dimensions, faster is the ideal Solution for any workshop: from stonemasons with limited space to large processing companies.

**MODERN,
FUNCTIONAL DESIGN**

MAXIMUM MACHINING PRECISION AND VERSATILITY

Creation of chamfers of a consistent size courtesy of the upper chamfering unit which "adapts" to the thickness of the material, with an automatic and manual slide block system.

Minimum workable width for splashbacks: 50mm

Ability to process materials of different thicknesses at the same time.

GUARANTEED RELIABILITY AND QUALITY OVER TIME

The robust structure that distinguishes Faster edge polishers ensures total reliability and excellent results.

Bench with anti-wear plates.

Automatic reading of the thickness of the panel for automatic adjustment of the devices.

Pneumatic pressers as standard for machining panels of different thicknesses at the same time, ensuring uniform pressure which is essential when processing ceramic materials, especially those that are thin.

Duplex presser wheels for a minimum head width of 120 mm.

QUICKER, SIMPLER SET-UP

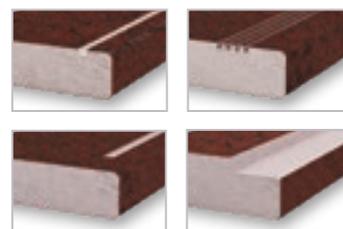

BLADE CUTTING/ CALIBRATOR DEVICE

- Shaped edges
- Drip tray
- Blind cutting
- Can be adjusted from 0° to 90°

BLADE CUTTING DEVICE

- Can be adjusted from -45° to +45°
- Blind cutting
- Drip tray
- Cuts at various angles

CLEANER/BUSH-HAMMER

- Cleaning of the underside
- Bush hammering

EXCELLENT WORKING ERGONOMICS

Control panel with swivel arm enables work from different angles and provides maximum visibility and ergonomics for the operator.

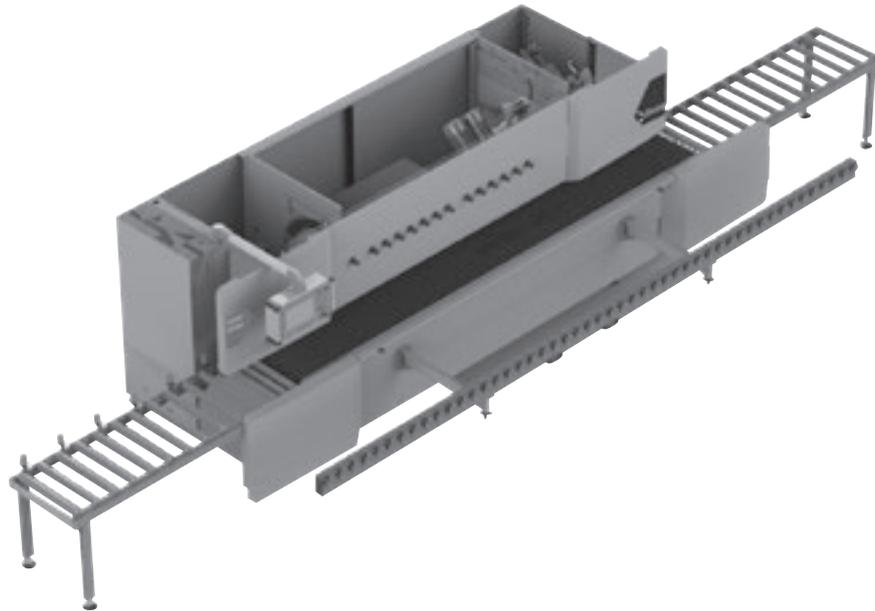

EXTREMELY EASY TO USE

INNOVATIVE, SIMPLE GRAPHICS TO FACILITATE THE USER EXPERIENCE

- Latest-generation 12" touch screen panel for easy, intuitive programming courtesy of the option of using previously-saved parameters.
- Ability to create parametrised machining "recipes" that can be called up in accordance with the thickness/material/chamfer size etc.
- Ability to perform machining operations on board the machine in "traditional" manual mode.

TECHNICAL DATA

The technical specifications and drawings are non-binding. Some photos may show machines equipped with optional features. Biesse Spa reserves the right to carry out modifications without prior notice.

Sound pressure level on operator workstation (LpA) 77,78 dB (A)
Uncertainty of measurement K = 4dB (A)

The measurement was carried out in compliance with UNI EN ISO 3746, UNI EN ISO 11202 and subsequent amendments with full processing (cutting).

The noise levels shown are emission levels and do not necessarily correspond to safe operation levels. Even though there is a relation between emission levels and exposure levels, this cannot be used reliably to establish whether or not further precautions are necessary. The factors determining the actual noise levels to which the operating personnel are exposed include the length of exposure, the characteristics of the work environment, other emission sources (e.g. the number of machines and machining operations nearby). At any rate, the above information allows the operator to better evaluate dangers and risks.

Founded in Italy,
international native.

We are an international company that manufactures integrated lines and machines to process wood, glass, stone, plastic and composite materials and what will come next.

Thanks to our rooted competence nurtured by an ever-growing worldwide network, we support your business evolution – empowering your imagination.

Master of materials, since 1969.

We simplify your
manufacturing
process to make
the potential of
any material
shine.
