SPEED. ACCURACY. PROFIT.

Professional Dimensioning *for* Production Improvement

WORK SUPER FAST WITH SUB-MILLIMETER PRECISION

What once took hours to measure is now captured in minutes, with unmatched accuracy down to a fraction of a millimeter. Powered by our latest Prodim wire-technology, the Proliner V9 delivers flawless measurements without compromise: on-site or in the workshop, indoors or outdoors, on any material, in any situation. Seamlessly integrated into your digital workflow, every detail is faithfully recorded, ready for immediate use. From intricate countertops to refined yacht interiors and striking architectural designs, the Proliner V9 adapts effortlessly. This new tool is more than a measuring tool. It's a breakthrough in efficiency. Work faster, eliminate rework, and achieve a perfect fit every time.

EFFORTLESS CONTINUOUS CURVE & SHAPE TRACING

Your work is anything but ordinary. So is V9! With our enhanced Trace Mode, capturing even the most elegant or intricate shapes becomes effortless. Just guide the Proliner pen across curves, edges, or surface variations, and the V9 system will precisely record every detail with digital accuracy. Instantly capture, refine, and transform data into flawless 2D or 3D models. It's that simple!

The logo for Proliner V9. It features the word "PROLINER" in a bold, sans-serif font, with a registered trademark symbol. Below it is a large, stylized "V9" in a script font. The logo is set against a white background with a teal geometric pattern.

PROLINER®
V9

INTUITIVE TOUCHSCREEN FOR CRYSTAL CLEAR VISUALS

The new Proliner display is designed for the brightest conditions. The high-contrast screen stays bright in direct sunlight, allowing you to take measurements in the marina or on a rooftop without sacrificing clarity. While measuring, view your captured points and shapes directly on-site in clear 2D or 3D. Rotate, zoom, and mark every critical dimension with a fingertip. Every curve, every angle, every measurement is confirmed to the millimeter before you pack your bags. Complete confidence, from the first point to the last cut.

QUICK AROUND-THE-CORNER MEASURING SOLUTION

Having trouble reaching a spot with our pointer? Our patented Quick IPT is designed for precision in the most challenging spaces. Just connect the IPT pen to the pointer, mark your virtual point, and you're done. No fuss, no guesswork. Flexibility and reliability, just around the corner.

BIG DIRECT REACH FOR ALL YOUR AMBITIOUS PROJECTS

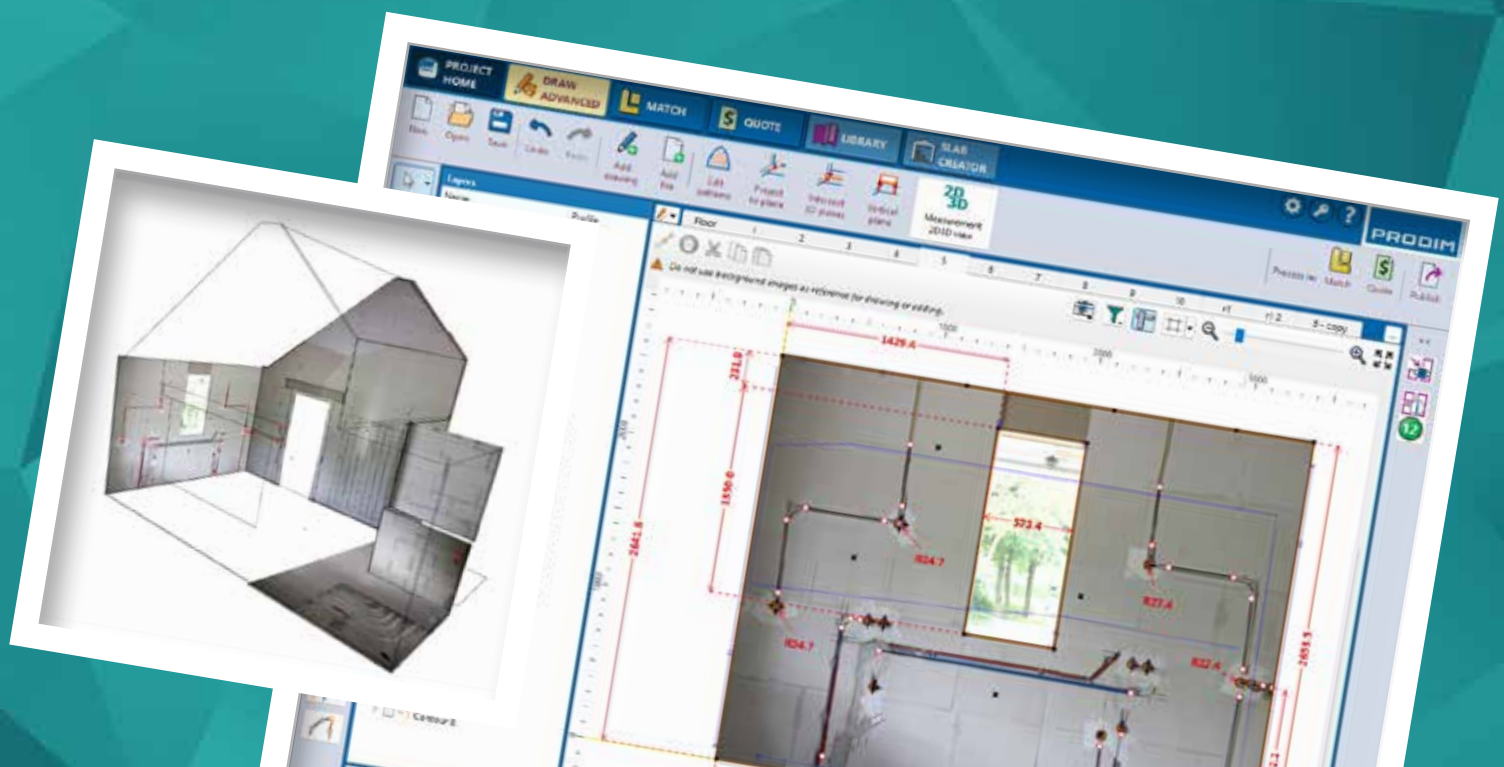

18 meters / 60 ft direct reach! That's exactly what it is: an extended range that lets you measure entire projects with the legendary millimeter precision the Proliner is known for. Combined with our Advanced Leap function, you gain exceptional flexibility and freedom, moving seamlessly between measurement points, overcoming spatial limits, and capturing every detail with confidence. The result is a measurement experience that's more capable, more efficient, and ready for your most ambitious projects.

LIMITLESS DESIGN WITH PRODIM **FACTORY** SOFTWARE

V9 connects effortlessly with Prodim Factory, Prodim's powerful design software and dozens of other software solutions, enabling you to send files wirelessly via Wi-Fi or Bluetooth straight to your office. From there, refine your work with precision: check geometries, run fit-checks, create visuals, and enhance your visuals with backgrounds or design patterns. And with built-in photogrammetry, you get ultra-realistic visualizations and accurate vein matching, helping you bring your vision to life, exactly as imagined. Experience total certainty and complete mastery of your projects.

IT'S CLOUD READY. IT'S FUTURE READY!

The Proliner V9 isn't just the best measuring device today, it's your measuring partner that never stops improving. With built-in Wi-Fi and over-the-air updates, it evolves with you, delivering new features and industry-specific apps that make your work faster, easier, and more accurate: Keeping you ahead of every challenge. Measure with confidence today, work smarter tomorrow!
